

Owners Update: Water Line Repair - November 20, 2020

New and Revised Information From Kimberling City Plumbing

A water leak has been found at a valve in the main water supply line near unit 454.

The repair of this valve will affect Units 436 - 494. (Previously 436 - 490)

The Repair is Scheduled for Monday; November 23rd.

Kimberling City Plumbing will begin work at about 8:00am.

Power Tools will be used to break up the concrete, so it may be loud.

Water will be Shut Off mid-morning and Turned On after installation.

For Units 436 - 494: (Units 492 & 494 Added)

There will be No Water Service during the Repair.

Additionally, there will be a drainage of water from your unit.

If you are not at your unit, we hope that you have followed our Best Practices by shutting off your water and turning off your water heater when you left.

If not, to prevent possible damage:

- **Turn Off your unit Water Supply Valve**
- **Turn Off your Water Heater.**

If you are unable to shut off your Water Supply and Water Heater, Please let us know immediately.

Units not identified above will not be affected during this repair.

Thanks for your continued cooperation.
