

Owners Update - February 5, 2022

Dryer Vent Installation Schedule Update:

Due to the Winter Weather, the Dryer Vent Installation was not completed this week.

The Board and Dryer Vent Wizard have rescheduled to complete the installations on:

Tuesday; February 15th - Thursday; February 17th

The Installations will begin in the Cove Building at unit 440 and continue to unit 400, then proceed to the Pool Building units 466 - 482.

Dryer Vents that have been installed and completed are:

Bridge View Building - All - Units 484 - 532

Cove Building - Units 442 - 464

Information:

Although the vendor is vacuuming after installation, in some cases it was necessary to remove some stored items in the utility closets to prevent them from getting dusty. These items were (or will be) placed in your kitchen area. These items will be left in the kitchen area and owners will need to move them back to the utility closet for storage.

Thank You for your continued cooperation and support.
